

IMG110 – Assignment 5

- 3.
- a. *What techniques are used to layout the tolinks navigation bar and its child elements in header?*

There is a horizontal floating element to the blocks for the navigation bar, a margin top of 50 px to give it some space from the top of the bar, it floats for a width of 33.3% of the header, and the text within the left align float is vertically centered.

- b. *What techniques are used to layout the tabs navigation bar and its child elements in header?*

The parent element defines where the child float block will sit because it gives the width of the box and tells it which side to float on as well as the margin space around the elements inside the box.

- c. *What techniques are used to layout the 3-column main content? How is the screen width shared among the 3 columns?*

You have a floating column format in the navigation, main article, and the aside which specifies section id's to define if it is left, center, or right column and what the rule is for that column. Doing this separates each column and its contents into their own floating blocks so it is easier to manage and organize them as one block then individualized elements.

- d. *What techniques are used to layout the article and its components in the middle column section#center?*

This article section has other elements that define specifics inside of the article. For example the article section is further broken down into individual floating elements like an article, a floating aside that sits on the right of the section#center, and a list. Each of these has a specific padding, margin size and line-height within the blocks created under the section#center block.

On Firefox the page displayed:

The screenshot shows a web browser displaying a recipe for 'Apple Bavarian Torte' by Lemking. The browser's address bar shows the URL 'https://nyarmie.imgd.ca/110user/a5/sf_torte.html'. The page features a teal header with navigation links: recipes, menus, holidays, market, shopping, columns, and messages. A left sidebar lists various recipe categories like Cakes, Candies, and Cookies. The main content area includes a large image of the torte, a description, ingredients, directions, and a 'Recipe Box' with options to add to a shopping list or share. Three user reviews are displayed on the right side of the page, each with a star rating and a profile picture. The footer contains copyright information and links to About, Developers, Privacy, Terms, and Help.

Apple Bavarian Torte ★ ★ ★ ★
by Lemking

A classic European torte baked in a springform pan. Cream cheese, sliced almonds, and apples make this the perfect holiday treat (12 servings).

[Rate/Review](#) | [Review Page](#)

Ingredients

- 1/2 cup butter
- 1/3 cup white sugar
- 1/4 teaspoon vanilla extract
- 1 cup all-purpose flour
- 1 (8 ounce) package cream cheese
- 1/4 cup white sugar
- 1 egg
- 1/2 teaspoon vanilla extract
- 6 apples - peeled, cored, and sliced
- 1/3 cup white sugar
- 1/2 teaspoon ground cinnamon
- 1/4 cup sliced almonds

Directions

1. Preheat oven to 450° F (230° C).
2. Cream together butter, sugar, vanilla, and flour.
3. Press crust mixture into the flat bottom of a 9-inch springform pan. Set aside.
4. In a medium bowl, blend cream cheese and sugar. Beat in egg and vanilla. Pour cheese mixture over crust.
5. Toss apples with sugar and cinnamon. Spread apple mixture over all.
6. Bake for 10 minutes. Reduce heat to 400° F (200° C) and continue baking for 25 minutes.
7. Sprinkle almonds over top of torte. Continue baking until lightly browned. Cool before removing from pan.

Reviews

- ★★★★ I loved the buttery taste of the crust which complements the apples very nicely.
— Reviewed on Sep. 22, 2017 by MMASON.
- ★★ Nothing special. I like the crust, but there was a little too much of it for my taste, and I liked the filling but there was too little of it. I thought the crunchy apples combined with the sliced almonds detracted from the overall flavor.
— Reviewed on Sep. 1, 2017 by GLENDACHER.
- ★★★★ Delicious! I recommend microwaving the apples for 3 minutes before baking, to soften them. Great dessert - I'll be making it again for the holidays.

On Internet Explorer, the page displayed as:

I notice that the drop shadow on the quotes is not being displayed in IE, nor is the gradient background on the Apple Torte center block.

And when I compared both to google Chrome, Google Chrome like Mozilla Firefox displayed the gradient and the drop shadows as well. So there is a problem with the IE browser and the formatting. Below is the screenshot from the Chrome browser.

Summary and Feedback

Course#: IMG 110 Section:CVS2 Assn#:5 Student Name: Natasha Yarmie

My URL: https://nyarmie.imgd.ca/110user/a5/sf_torte.html

It took me 5 hour(s) to complete the assignment. I have learned and feel good about 95% of the skills covered in the Chapter. From the assignment work I learnt the following:

- How to create filter drop shadows around images, and what the difference is between using a box-shadow instead.
- How to add gradient colours to the backgrounds,
- How to format elements using the transform and perspective to change shapes
- How to make corners around elements round and specify the different radius % for a lesser or greater round edge
- How to create shadows around elements to give depth to features
- How to fit an image into an element
- How to make icons round instead of square

The difficulties I encountered with this assignment:

The most troublesome part of this assignment was definitely figuring out the difference between a box shadow which gives a rectangular shadow behind the element, and what a drop-shadow is and how it shapes to the element itself. That easily took the most time to figure out.

The sections / topics that I would like to review further:

I'd like to try creating a hotspot in my own time and playing around more with the transform and the tiling of background images. I think you can make some cool effects with this tool.
